

CleanTech Open 2025: Administrator Operations Manual

Complete guide to managing judge accounts, overseeing startup assignments, and monitoring evaluation progress across the 2025 cohort.

Target: Program Directors & Diligence Leads

Portal URL: /admin.html

Version: 2.4 (Clean AI Release)

Updated: September 2026

1 Overview & Diligence Architecture

The CleanTech Open Diligence Platform coordinates the multi-judge evaluation of 92 cleantech startups across 10 evaluation categories (282 rigorous criteria). The platform features an AI Due Diligence Copilot and live PDF viewer with auto-citation indexing to accelerate judge reviews while enforcing strict accountability.

Platform Key Components

- **Admin Portal (/admin.html):** Dedicated dashboard for operations leads to create judges, assign companies, and monitor completion rates in real time.
- **Scorer Portal (/index.html):** Focused 3-column evaluation workspace where judges examine company deliverables, view AI suggestions, and enter final scores.
- **PostgreSQL Database (Supabase):** Stores judge rosters, encrypted passcodes, assignment mappings, and question reviews with instant transactional auto-saving.
- **Clean AI Copilot Engine:** Advanced reasoning model (Qwen 35B) running on sanitized founder text with 0% competition scaffolding and 92.7% PDF page-indexed citations.

2 Accessing the Admin Dashboard

To access the administrative tools:

1. Navigate to /admin.html in any modern desktop browser (Google Chrome, Safari, or Microsoft Edge recommended).
2. When prompted by the modal overlay, enter the administrator credentials:
 - **Admin Username:** admin (or designated admin handle)
 - **Passcode:** Your secure administrator passcode
3. Click **Log In**. The session will persist automatically in local storage until you click **Log Out**.

3 Managing Judges & Reviewers

Judges only have access to startups explicitly assigned to them. Administrators can quickly onboard new judges and view active reviewer credentials on the left side of the dashboard.

How to Create a New Judge

1. Locate the **Create New Scorer** card on the left panel.
2. Enter a memorable, unique **Scorer ID**. Recommended convention:
 - judge_smith or judge_chen (Named judges)
 - J-001, J-002, J-003 (Numbered panel IDs)
3. Enter a secure **Passcode** (e.g., 4-digit code or memorable passphrase).
4. Click **Create Scorer**. The judge is instantly registered in Supabase and appears in the **Existing Scorers** roster below.
5. Provide the judge with the portal URL (/index.html), their Scorer ID, and their passcode.

Security & Credential Recovery: All active judge IDs and their passcodes are displayed in the "Existing Scorers" scrollable box. If a judge misplaces their passcode, you can read it directly from this panel without needing to reset their database account.

4 Assigning Startups to Judges

The assignment workflow gives administrators full control over distribution, ensuring dual-reviewer consensus and preventing accidental assignment of incomplete applications.

74 / 92 Ready for Assignment

✓ Ready for Assignment

Show All (92)

☒ 17	✓ Clean AI Ready	142 Answers	1 Assigned
☐ Calectra	✓ Clean AI Ready		0 Assigned
☒ Novagrid	✓ Clean AI Ready	Not Started	2 Assigned

Step-by-Step Assignment Protocol

1. **Select a Scorer:** Choose the target judge from the *"Select Scorer to Assign Companies"* dropdown. The list immediately refreshes to reflect that judge's assignments.
2. **Use the "✓ Ready for Assignment" Filter:** Always keep this filter active. It restricts the visible list to startups that have 100% completed clean AI extraction and PDF citation reverse-indexing.
3. **Assign or Unassign Companies:** Check the box next to any startup to immediately assign it to the selected judge. Unchecking removes the assignment. Every toggle commits to the database instantly.
4. **Track Cohort Progress:** Next to each assigned company, observe the judge's completion status:
 - **Not Started:** The judge has not answered any questions yet.
 - **X Answers:** Number of rubric questions answered so far (out of 282).

5 Understanding Assignment Badges & Distribution

To ensure high statistical validity, each startup should ideally receive two independent evaluations. The admin dashboard provides visual cues to guide assignment balancing:

Badge	Cohort Status	Administrative Meaning & Action Required
0 Assigned	Unassigned	No judge is currently assigned to this startup. Action: Assign to an available reviewer.
1 Assigned	Partially Assigned	One judge has been assigned. Action: Assign a second independent judge for dual-review consensus.
2+ Assigned	Fully Assigned	Two or more judges have been assigned. Dual-blind consensus requirement is satisfied.
✓ Clean AI Ready	Pipeline Complete	The startup has completed 282/282 clean AI extractions and all citations are reverse-indexed to PDF pages.
⌚ Extracting AI	In Progress	Clean AI extraction is currently executing on the remote GPU server. Do not assign until extraction completes.

The Assignment Distribution Bar Chart

Directly beneath the scorer roster, the dashboard renders a real-time bar chart illustrating the overall state of the cohort:

- **Yellow Bar (Unassigned):** Count of startups with zero reviewers. Aim to reduce this to 0.
- **Orange Bar (1 Assigned):** Count of startups with only 1 reviewer. These require a second assignment.
- **Green Bar (Fully Assigned 2+):** Count of startups with two or more assigned judges.

6 Administrative FAQ & Operational Rules

Recommended Reviewer Workload

We recommend assigning **3 to 5 startups per judge**. Each startup evaluation requires approximately 45 to 60 minutes. Overloading reviewers beyond 6 startups increases fatigue and decreases qualitative justification quality.

What Happens if a Judge Drops Out?

If a judge cannot complete their assignments, simply select their name from the dropdown and uncheck the company. Any answers already submitted by that judge are safely preserved in the database (`human_reviews`) and can be audited later. You can immediately assign the company to a replacement judge.

Can Judges See Other Judges' Scores?

No. The scoring portal is strictly double-blind. Judges only see the AI suggestions, founder deliverables, and their own scoring answers. They cannot view who else is reviewing the startup or what other judges have scored.
