

SPARK Cleantech Open Assignment: Inclusion as a Go-To-Market Strategy

Inclusive GTM Pillar	Strategy & Change: What changes will you make?	Results: What outcomes do you expect? Provide numbers or % improvement where possible.
Inclusive Design	• Simplify the IEH dashboard with clear, intuitive controls and visual insights that work for both tech-savvy and non-technical property managers. • Pilot co-design sessions with mid-market building operators and small business owners to ensure the product meets the needs of underserved and overlooked commercial segments.	• 30% improvement in customer onboarding time (measured by how quickly users can manage their building energy without external help). • 20% increase in adoption rates among smaller or less digitally mature property management firms.
Inclusive Hiring	• Partner with technical bootcamps and networks like Reskill Americans and Latinas in Tech to build a pipeline of diverse engineering and go-to-market talent. • Revise all job descriptions to remove unnecessary degree requirements and implement structured interviews to reduce hiring bias.	• 40% of technical hires from underrepresented groups by 2026. • 10% increase in sales conversion rates due to teams better reflecting customer demographics and needs.
Community as Channel	• Collaborate with local chambers of commerce and minority business associations to host educational workshops on energy cost reduction and intelligent building technologies. • Launch referral programs with community-based organizations to build trust and expand access to mid-market properties.	• 500+ qualified leads from minority-owned or underrepresented mid-market properties by the end of 2025. • 30% of early adopters acquired through community-based referrals and partnerships.
